

STUART SMITH'S

# AGE OF ADVENTURE

ELECTRONIC ARTS™

# BACK IN THE DAYS BEFORE CALCULATORS,

Stuart Smith was the kind of kid who won prizes in math contests and amused himself by scribbling Greek symbols on his mother's tablecloth. Little did he suspect that twenty years later he would marry a belly dancer who would suggest the classic story of Ali Baba as a game theme. The early scribbling expanded into a fat notebook and eventually became Ali Baba and the Forty Thieves, a game that included the musical theme he played at his piano in the evenings.

Stuart's fascination with the Golden Age led him to Robert Graves and classical Greek mythology; he soon began to dream of ways to incorporate some of the lesser-known myths into his next adventure game, The Return of Heracles.

To see him spending quiet time with his family and large collection of household pets, it's hard to imagine that this is a man who is still waiting for the trip to the stars (accompanied by the Galactic Wizard) that he was once promised in a fortune cookie.

# THE GREATEST ADVENTURES IN HISTORY

*You left the body of the god-like Achilles floating in Hydra's vile pool. The Medusa slew both Odysseus and the mighty Ajax before you stained the dust with her blood. Of all your heroic company, you alone have survived to face Zeus — and the the last of his twelve deadly tasks.*

*The ferocity of the ambush forces your back against the glittering tunnel wall. With a sudden cry, the Halfling charges — only to be cut down by the thieves' flashing blades. Your hand tightens on your dagger as your band prepares to face the coming attack. Allah willing, there will be many opportunities to avenge the death of your friend.*
