MANHUNTER™

HINT BOOK

Introduction

Greetings *Manhunter*. Are those Orbs getting you down? Are you lost in New York with no place to go? Cheer up! With this handy little book you'll be covering new ground in no time - but first, some background.

As you make your way through *Manhunter*: New York, you will learn what the evil orbs are up to, discover secrets of the underground human movement and find yourself on the trail of a deadly killer. To make progress in *Manhunter*, you will do, use, or find things at various locations. Sometimes the solution is obvious - you would naturally use a crowbar to open a stuck window. Other solutions have clues in other parts of the city. Keep your eyes open. Search each location by moving your marker over every object that you see. If you get stumped, travel to the other locations in the city. The clue you need may be across town.

There is no score in *Manhunter*. If you make it to the end of the game, you've won. This hint book will get you through to the end. If you have a problem that isn't covered here, feel free to contact Sierra's 24-Hour hint line at (209) 683-6858.

How to use a hint book

If you reach a point where you can't go any further, look through this book and find the day that you are in and your location. Use your Adventure Window card by placing the red window over the patterned area to read your desired answer. Hints progress from mildly helpful to a direct answer. It's best to read them individually, and in sequence. Be sure to read only those hints you really need.

How not to use this hint book

The Orbs will not like it if you just scan through the book reading all the answers! You will lose a lot of enjoyment (and sleepless nights) in discovering the game. Read only those hints which are absolutely necessary, and as few of those as you can.

If you have finished *Manhunter*

After you have "won" the game, we invite you to check out the back of this book. It contains more interesting information. But be very cautious using this section! Don't even look at it until you have actually seen the end of *Manhunter*.

Thank you for purchasing *Manhunter* and this book. If you like this kind of game, let us know. Remember, the Orbs are watching you!

The video game maze that you saw back at the Flatbush Bar is the map to the sewer maze! You start in the same spot as the man in the maze game starts. Before you find your way to the end, go to each area in the maze where there is a magic square. At each magic square location you will find a keycard. You should have 12 keycards when you get to the end of the maze.

What is that shiny thing on the dock?

Position the marker over the shiny thing on the dock. When it becomes a magnifying glass, press ◀ENTER▶.

It is called a medallion. Position the marker over it and press ◀ENTER▶ to take it.

Look out the cave by positioning the marker over the cave and pressing ◀ENTER▶.

What you see in the distance is your clue as to where you should go next.

The ferris wheel that you see in the distance is at Coney Island. Travel to Coney Island.

There is only one place you can go here. Can you find it?

Position your marker over the booths on the left. When the marker changes, press ◀ENTER▶.

There is definitely something you should do here!

Don't those kewpie dolls look familiar?

Remember the instructions to the video game in the bar, "the correct path leads you to the kewpie dolls..."

When you take the shortest path to the end of the maze in the video game, you will pass over three magic squares that will trigger three balls to be thrown that will knock over three kewpie dolls. Knock over the same three kewpie dolls in the same order.

Knock over the third doll on the top shelf. Then the second doll on the second shelf and finally the fourth doll on the bottom shelf.

Show him what he wants to see!

If you show him the medallion, he will know that you are on his side and give you a data card.

Day 2

I've watched the tracker for day two, what now?

Go to the first place your target was in (Grand Central).

Grand Central Terminal

Here I am at Grand Central, what do I do?

Position your marker over the address in the lower left of the screen and press **DOWN/ENTER**.

That's not the address and then press it the next place your target went (the Wretched Excess in Greenwich Village).

Wretched Excess

I'm trying to get inside but the blue dude won't let me!

First, position your marker over the first dude to get his name (John MADD). Press **E**. You'll see a list and press on John MADD. Select that and then press **C** as John MADD.

You still have to find another way to get inside.

Position your marker over the alley and press **DOWN/ENTER**.

Be prepared but be alert! Danger is near!

I've made it past the first three punks but the fourth one gets me every time. What do I do?

Watch his arm closely. Whenever he starts to raise up, however he starts to pull down. When you see him pull, you need some way that if you do get killed, you don't have to start from the beginning.

I'm inside now but I don't know what to do.

You need to tap the shoulder of the target you have been following. He cannot throw the rest of the audience come for the cruise and won't appreciate it if you bother them.

Which one is the target you are tracking? Think about it for a minute and if you can't figure it out, I'll talk you.

The members of the audience at the Wretched Excess are wearing their designer shoes. The target you are tracking the just ran in came off the street in last after leaving from Grand Central Terminal. If you can't figure it out, look at the red arrow and we will spell it out for you.

The target is wearing the brown robe. Get ready to grab the robe and then she drops.

I am outside the Wretched Excess again, what do I do now?

You should have 17 seconds now. If you only have 12, go back inside and get the box out.

If you have 15 seconds, open MADD. Select Teacher. Tap the second target by positioning your marker over his middle finger and press **DOWN/ENTER**.

Travel to the first place your target was at (Grand Central).

Position your marker over the activity at the lower left of the screen and press ◀ENTER▶.

Check out the activity and then travel to the next place your target went (the Wretched Excess in Greenwich Village).

First, position your marker over the blue dude to get his name. Open MAD (press C), select info and type in Louis Redman. Select Exit and then press C to close MAD.

You will have to find another way to get inside.

Position your marker over the alley and press ◀ENTER▶.

Go forward but be alert, danger is near.

Watch his arm closely. Whenever he lowers it, jump up. Whenever he raises it, duck down. When you go forward, save your game so that if you do get killed, you don't have to start from the beginning.

You need to tap the shoulder of the target you have been following. Be careful though, the rest of the audience came for the music and won't appreciate it if you bother them!

Which one is the target you are tracking? Think about it for a minute and if you can't figure it out, I'll tell you.

The members of the audience at the Wretched Excess are wearing their designer robes. The target you are looking for just ran in here off the streets to hide after breaking into Grand Central Terminal. If you still can't figure it out, look at the next answer and we will spell it out for you!

The target is wearing the brown robe. Get ready to grab the keycard that she drops!

You should have 13 keycards now. If you only have 12, go back inside and get the last one.

If you have 13 keycards, open MAD. Select Tracker. Tag the second target by positioning your marker over the middle target and press ◀ENTER▶.

Vend-o-Deli

What do I do at the deli?

Put meat and bread in the machine. Watch the red coin
go down.

Put down the change. Push out the hot slice. Watch the coin
come back from the slot in the back.

Central Park

I keep dying at the park, what gives?

Don't get close and get hit by the car.

Look at the big red ball rolling down from the top of Central
Park that has nothing to do with the game. For all you know, that ball
may stop at Central Park and roll down the hill to the bottom of the park.

It's a ball that's not even very big and it's not over
the edge of the park and it's not the center of the park. It's just a
ball that's not very big and it's not over the edge of the park.

Go inside and look at the bulletin boards. Which note did your target leave?

You don't have enough clues yet to determine which note he left, but you will soon. Travel to Central Park.

There is only one safe path through the park.

Look at the tracker and outline their path on the map of Central Park that was enclosed with the game. Put an X at every spot that they stop at. Close the computer and use your map to find your way through the park.

If you still can't find your way through the park, use your Adventure Window card to locate the correct path. Be sure to take the crowbar when you find it.

I found another corpse, what should I do now?

Position the marker over the heart and press. **RECEIVED**

Position the marker over the forehead.

Back up.

Position the marker over the heart on the ground next to the body and press. **RECEIVED**

When it's time to write on the back of the tag, mark the back.

What do you think it has first done?

The answer is on the tag card. Select **Done** and **Mark** on screen.

What happens? I was busy and the marker is **RECEIVED**.

That is correct.

Yes, that is the marker's first name and the last name is also something.

What does the marker tell us on the tag card? I am **alone** right after you find it at this time in forensic work. The back says **RECEIVED**.

What else does the marker tell us? The last part of the marker is **RECEIVED**. I was busy and the marker is **RECEIVED**. The back says **RECEIVED**.

Vend-o-Deli

I traveled back to the deli but now what?

Press the button over the slot marked with a **V** and select **Go** on the screen to make the name.

It says you have been marked on the slot. The name and the name are in **RECEIVED**.

It is the name and the name is marked as a name. Select **Go** on the screen.

The slot that is marked is marked as **RECEIVED**. Select **Go** on the screen to make the name. The name and the name are in **RECEIVED**. The name and the name are in **RECEIVED**. The name and the name are in **RECEIVED**.

I'm still a little confused. Who are Anna and Harvey?

She is the one that is the name of the marker to see what was marked on screen. Then she had the marker to make the name. She was in the marker to make the name. The name and the name are in **RECEIVED**. The name and the name are in **RECEIVED**. The name and the name are in **RECEIVED**. The name and the name are in **RECEIVED**. The name and the name are in **RECEIVED**.

Position the marker over his head and press ◀ENTER▶.

Position the marker over his forehead.

Back up.

Position the marker over the staff on the ground next to the body and press ◀ENTER▶.

Notice the name on the handkerchief (H. Osborne). Also notice the name Anna.

Back up.

Notice the word the corpse tried to write on the rock.

What he tried to write on the rock is the last name of his murderer!

What do you think is his first name?

The answer is on the data card. Select Data Card from Inventory.

Still stumped? I would say that the murderer is trouble.

Phil is trouble.

So Phil is the murderer's first name and his last name is Coo something.

We give you another clue to the murderer's last name right after you look at the sign at Strawberry Fields. Go back and look again.

Don't get your goose "cooked"... The last name of the murderer is Coo...k! Phil Cook! Open MAD, select Info and type in Phil Cook. Then travel back to the Deli.

Go to the bulletin board that the suspect went to. If you forgot, use the tracker to replay that scene.

It was the bulletin board nearest the back wall. Go there and find the note that H. Osborne left.

It is the only note that is signed by a name starting with an H. (Harvey).

The dead man in the park is Harvey Osborne! Open MAD, select Info and type in Harvey Osborne. Select Repeat and type in Anna Osborne. Anna Osborne is Harvey's wife and the target you tracked on day 1.

She is the one that set the bomb at the hospital to see what was going on inside. Then she hid something at Trinity Church. She went to the Flatbush bar to copy the maze. At the ladies room at Prospect Park, she used the three-flush code to get to the sewers and dropped the medallion on the dock before leaving in her boat. The next night, Anna, her husband Harvey and someone else broke into Grand Central to steal a maintenance robot. Then they split up and Anna went to the Wretched Excess to hide. That is when she knocked you out. Then she returned home (W. 82nd).

He said, "Don't look at a clock. Just go past a store on the
fifth floor. There is just an open box and the shopkeeper with a
friend. But there are many things in it. Where do you want to go,
and what will you have? (And the clock is still there.)"

Then I said, "I am at the clock. Is there a clock on the fifth
floor?"

He said, "I am at the clock on the fifth floor. Is there a clock on the fifth
floor? (And the clock is still there.)" (And the clock is still there.)

W. 82nd

Here I am at W. 82nd. Should I go inside?

Yes, I am at the clock on the fifth floor. Is there a clock on the fifth
floor? (And the clock is still there.)

Then I said, "I am at the clock on the fifth floor. Is there a clock on the fifth
floor?"

He said, "I am at the clock on the fifth floor. Is there a clock on the fifth
floor?"

I've seen all I want to see here! Where to now?

He said, "I am at the clock on the fifth floor. Is there a clock on the fifth
floor?"

I am at the museum but how do I get in?

Then I said, "I am at the clock on the fifth floor. Is there a clock on the fifth

But the back doors are locked!

Then I said, "I am at the clock on the fifth floor. Is there a clock on the fifth
floor?"

He said, "I am at the clock on the fifth floor. Is there a clock on the fifth
floor?"

I'm inside but which way do I go?

Then I said, "I am at the clock on the fifth floor. Is there a clock on the fifth

American Museum of Natural History

Meanwhile, Harvey went to Vend-o-Deli to put a note on the bulletin board. Here he met up with Phil who he thought was a friend. Phil lured him into Central Park, where he murdered him. And you still haven't found the stolen robot!

Open MAD and select Tracker. At Grand Central, tag the third target.

When the third target gets to the American Museum of Natural History, trace his path on the diagram of the museum that is on the map that was enclosed with the game. Travel to Harvey and Anna's apartment on W. 82nd.

Yes! Go inside and position the marker over the sack on the floor. Take the key and then back up.

Press the button on the back wall by the door.

Position the marker over the body and press ◀ENTER▶. It looks like Phil got here before you!

Travel to the museum.

Position the marker over the right side of the building. When it becomes an arrow pointing to the right, press ◀ENTER▶.

Usually you use a key to open a lock.

Select the key from Inventory (the one you got at the Osborne's apartment). Position the marker over the open door and press ◀ENTER▶ to enter.

Follow the path that the target in the Tracker took. You should have drawn it on the diagram of the museum that is on the map that was enclosed with the game.

Travel to Greenwood Cemetery.

Look closely for clues.

The clues are on the tombstone that is at the end of the grave that the orb is planted on.

The clues are Tim Jones and that he is survived by his father. Tim Jones is not in info because he is deceased. Reno Davis was in info because the orbs didn't want you to know that Reno is deceased. Travel to Trinity Church.

Go to the same candles that Anna went to on day 1.

Go to the candles on the left side.

You have seen the clue for the candles, use it!

Remember the tattoo on the dead man in the museum?

Light the three candles that are indicated by the tattoo (the first candle on the top shelf, the third candle on the middle shelf, the fourth candle on the bottom shelf).

Books in this series

Summary: The authors present a new method for the analysis of the time series of the monthly unemployment rate in the United States. The method is based on the decomposition of the time series into a trend, a seasonal component, and a random component. The trend is estimated by the method of least squares, the seasonal component by the method of least squares, and the random component by the method of least squares. The results of the analysis are presented in the form of a graph and a table.

Phil keeps murdering me. What am I doing wrong?

Watch his back, Sam. When he drops a bomb, listen to what it says. When he moves to a neutral position, back off. A defensive move will override an offensive move. At the same time, the bomb falls after you start a punch. So, the appropriate defensive move is to duck. The problem with you was you ducked first.

I finally beat Phil! What is my next move?

What was the job?

Can you think of someone you might be able to ask this question?

That's right, slash the opening in the ceiling above the tunnel and then move to the throne at Times Square.

Theater in Times Square

Here I am at the theater again. What should I do?

If you forget the number on the door, open M&D, select Info and type 60315. The door will remember last number and close M&D.

Look at these numbers 1234567890 and then look at the picture again.

Look at the arrows. The first arrow points to the left of the three, the last arrow points to the right of the three. What is to the left and what is to the right of a three? (2 and 4.)

The math is in the middle. $3 + 3 = 6$.

The answer is 264.

There are three numbers in this combination.

The answer is in the vase.

Look at the dead twigs.

Count the branches on the dead twigs.

The answer is 425.

Of course!

Notice the P on his forehead. Looks like Phil has been here just ahead of you.

Don't back up until you know the corpse's first name.

Look at his lapel.

His name is Harry.

Go to the only place you can go, around the corner.

Watch his knife hand. When he drops it, jump. When he raises it, duck. When he moves to a neutral position, punch. A defensive move will override an offensive move so if Phil moves his knife hand after you start a punch, select the appropriate defensive move (jump or duck). Be patient and you will soon defeat him!

Pick up the note he dropped.

Can you think of somewhere you might be able to use this number?

That's right, click the opening in the ceiling above the ladder and then travel to the theater in Times Square.

If you forgot the number on the note, open MAD, select Info and type NOTES. Write down or remember that number and close MAD.

One in the safe and type in the code 10057000.

Take the note in the safe. I need to find a address the Empire State Building.

The Empire State Building

I am in front of the Empire State Building. How do I get inside?

Enter the address over the front door and press **ENTER**.

I'm in someone's office and don't know what to do.

Position the printer over the assembly in the office and press **ENTER**.

I'm in front of the computer but it doesn't seem to be working. What do I do?

Turn it on.

Position the printer over the printer switch and press **ENTER** to turn it on.

I give up, what's the password?

Write down the code in the computer.

The answer is 10057000.

I have gained access to the computer but should I continue?

You probably shouldn't. But if it works! Position the printer over the Loading button and press **ENTER**.

Alpha, Beta, Gamma and Delta are the code words for the four ore processing sites in the city. You can get information on these sites by clicking the appropriate boxes. Try to figure out the location of the four sites and to make changes that will help your agent.

What are the four sites and what are the correct settings?

Alpha is Refining Division. This is where the ore is converting minerals into a fine source. Assign the guard robot back setting.

Beta is Grand Central Terminal. This is where the ore are loading and repairing their spaceship fleet including the Mother Ship. Remember Harrison's note that he wrote after breaking into Grand Central. We saw the monster.

Gamma is the Statue of Liberty. This is where the ore are generating the red gas that makes the city darker and the ore to breathe and makes humans sluggish and easier for the ore to control. Assign the guard robot to Gamma Patrol.

Delta is the Empire State Building. It houses the Ore Advanced Slave Computer.

OK, I am done using the computer, now what?

Save your work and go back away from the computer and sit standing in the office. There were your partner.

Go to the safe and type in the code (843769).

Take the note in the safe. Travel to Phil's address (the Empire State Building).

Position the marker over the front door and press ◀ENTER▶.

Position the marker over the computer on the table and press ◀ENTER▶.

Turn it on.

Position the marker over the on/off switch and press ◀ENTER▶ to turn it on.

You found it in the safe in the theater.

The answer is UCUC.

You probably shouldn't, but do it anyway! Position the marker over the Continue button and press ◀ENTER▶.

Alpha, Beta, Gamma and Delta are the code words for the four orb strongholds in the city. You can get information on these sites by clicking the appropriate boxes. Try to figure out the location of the four sites and to make changes that will help your quest.

Alpha is Bellevue Hospital. This is where the orbs are converting humans into a food source! Assign the guard robot hall security.

Beta is Grand Central Terminal. This is where the orbs are hiding and repairing their spaceship fleet including the Mothership. Remember Harvey's note that he wrote after breaking into Grand Central? "We saw the mother..."

Gamma is the Statue of Liberty. This is where the orbs are generating the red gas that colors the sky, makes it easier for the orbs to breath and makes humans sluggish and easier for the orbs to control. Assign the guard robot to Ground Patrol.

Delta is the Empire State Building. It houses the Orb Alliance's Main Computer.

Select Quit until you back away from the computer and are standing in the office. Then save your game!

Select Travel.

Press Repeat. A signal will enter the screen from the port at the bottom of the screen. Position your marker over that signal and press ◀ENTER▶ to tag it. If you lose sight of it, press Repeat and try again.

Remember the dead man under Abdul's Pawn Shop? Did you figure out his name yet?

You found his first name on his lapel (Harry). What is his last name?

Remember the dead orb at Greenwood Cemetery? That orb was killed by Harry after the orbs killed Harry's son. In defiance, Harry placed the orb shish-ke-bob on his son's grave. Then he went to his office at the theater in Times Square and put the secret code to Phil's computer in his wall safe. Later, he met up with Phil who led him to the pawn shop. Under the pawn shop, Phil murdered Harry to get the combination to his safe. It was right after that occurred that you caught up with Phil.

The name of the son is Tim Jones. The name of the father is Harry Jones. Open MAD, select Info and type Harry Jones.

Travel to Harry's apartment. It is at the south tip of Manhattan Island.

The diagram on the blackboard at the end of the museum was a map of Harry's apartment and indicated where something useful is.

There is something useful at the radio!

Maybe there is something inside the radio.

When you are looking at the radio, use the crowbar.

Take the module. Then travel to Bellevue Hospital.

Go inside the same way you did before. If you used Phil's computer properly, the robot guard should be gone! Go through the doorway that the robot is no longer standing in.

Position the marker over the air vent above the bone pile and press ◀ENTER▶.

How do I get rid of this screen?

First, you'll need to pry it out of them.

Select the crowbar from inventory.

I keep getting shot when I try to go inside. What do I do now?

What about the guard robot for me. If he doesn't move with the crowbar didn't program him correctly in Van's computer.

After the guard robot moves, position the marker over the control panel and press **SHIFT+ENTER**.

What do I do at the control panel?

Take the controls!

Position the marker over the red bar and move it up or down to set the vent moving. Then position the marker over the top of the ladder and it turns into an up arrow. Press **SHIFT+ENTER**.

If you missed the controls the wrong way, you will get another chance to move. Watch the caution sign.

I am in a climbing maze. How do I get out of here without getting hit by a jolt of electricity?

There are no locks here. You just need to avoid the jolts of electricity and try to find your way in the maze. Save your name often and then when you are you can restore your name without re-loading a file.

I am outside the hospital again. Where do I go now?

Travel to Grand Central Terminal.

Grand Central Terminal

I am in front of Grand Central, what now?

Go to the area that was damaged earlier.

The reports are complete. How are you going to get through now?

Slashes the shield to let us pry the vent back open.

Select the crowbar from inventory.

The vent is open, is it safe to go inside?

Position the marker over the area just open. Press **SHIFT+ENTER** to go inside it.

I am looking at the ship's cockpit but nothing seems to be working.

The ship needs some things before you can take flight.

Select the gas canister from inventory.

After the markers are in, turn the gas canister and press it down to the left of the lock button.

You will need to pry it out of there.

Select the crowbar from Inventory.

Wait until the guard robot leaves. If he doesn't leave with the orb, you didn't program him correctly in Phil's computer.

After the guard robot leaves, position the marker over the control panel and press ◀ENTER▶.

Take the module!

Position the marker over the red handle and move it up or down to get the belt moving. Then position the marker over the top of the ladder until it turns into an up arrow, press ◀ENTER▶.

If you moved the handle the wrong way, you will get another chance to move it the other direction.

There are no tricks here, you just need to avoid the jolts of electricity and try to find your way to the window. Save your game often and then when you die you can restore your game instead of starting over.

Travel to Grand Central Terminal.

Go to the vent that was damaged earlier.

The repairs are complete. How are you going to get through here?

Maybe you should try to pry the vent back again.

Select the crowbar from inventory.

Position the marker over the ship and press ◀ENTER▶ to go inside it.

The ship needs four things before you can turn it on.

Select the four modules from inventory.

After the modules are in, find the power button and press it (just to the left of the view screen).

The power is on now, what next?

You need to check the power is on for the main engine.

You need to check the power is on for the main engine.

I've died more times than I care to count, what is the right thing to do?

You need to check the power is on for the main engine.

I've taken off but can't find the exit.

You need to check the power is on for the main engine.

In the Spaceship

I saw Phil take off in his ship and I'm in the cockpit of my ship. What do I do now?

You need to check the power is on for the main engine.

You need to check the power is on for the main engine.

You need to check the power is on for the main engine.

Ready to Bomb

I am ready to bomb something but don't know what to bomb.

You need to check the power is on for the main engine.

You need to check the power is on for the main engine.

You need to check the power is on for the main engine.

You need to check the power is on for the main engine.

You need to check the power is on for the main engine.

You need to check the power is on for the main engine.

You need to check the power is on for the main engine.

You need to check the power is on for the main engine.

THE END

This would be a good place to save a game.

Several buttons are active now. Try pressing some of them.

You need to close the hatch first thing. Press the hatch button. It is the middle one at the bottom.

You need to open the exit door on the right wall before you take off. If you have taken off without opening the exit door first, land the ship on the pad that it took off from. Then you will have the opportunity to open the exit door.

Make sure that the four bombs are armed. They are just right of the view screen. If they are not lit up, press the switch at the base of the four lights.

If the viewscreen is not on, press the button below it.

When the view screen is on, position the marker over the screen and press ◀ENTER▶ for a closeup.

You have four bombs and there are four targets for you to bomb.

The four targets are the four orb strongholds that you learned about when you used Phil's computer.

Your four targets are:

1. Alpha: Bellevue Hospital. The orbs are using the hospital to experiment on using humans as a food source and most of the orbs are concentrated here.
2. Beta: Grand Central Terminal. The orb fleet of spaceships are stored here, including the mother ship. (Remember Harvey's note in the deli, "We saw the mother...")
3. Gamma: Statue of Liberty. This is where the orbs make the red gas that they pollute the atmosphere with. (Remember the data card message, "Destroy the Lady...")
4. Delta: the Empire State Building. The Orb Alliance's Main Computer is located here.

If you don't know where the Statue of Liberty, the Empire State Building, Grand Central Station or Bellevue Hospital is, you can find them on the map that was enclosed with the game.

After you bomb the four sites, you have smashed the orb presence in the city and made it safe once again for humankind!

AFTER THE END

This section contains information about things you may not have seen while playing the game and other useful information.

1. **Introduction:** The first paragraph introduces the topic of the research paper, which is the impact of climate change on the environment. It states that the purpose of the study is to investigate the various ways in which climate change is affecting the planet and to identify the most significant threats to the environment.

2. **Background:** The second paragraph provides a brief overview of the current state of climate change. It mentions that the Earth's temperature is rising, sea levels are rising, and extreme weather events are becoming more frequent. It also notes that these changes are having a significant impact on the environment and on human society.

3. **Methodology:** The third paragraph describes the methods used in the study. It states that the research is based on a review of the scientific literature on climate change and its impacts. It also mentions that the study includes data from various sources, including government records, scientific studies, and news reports.

4. **Results:** The fourth paragraph presents the findings of the study. It states that the research has identified several key areas where climate change is having a significant impact on the environment. These include rising temperatures, rising sea levels, and increasing frequency of extreme weather events. It also notes that these changes are having a significant impact on the environment and on human society.

5. **Conclusion:** The fifth paragraph concludes the paper by summarizing the main findings and by providing some recommendations for future research. It states that the research has shown that climate change is having a significant impact on the environment and that it is important to take action to address this problem. It also suggests that further research is needed to better understand the impacts of climate change and to develop effective strategies for mitigating its effects.

You will see a close-up of the view screen map with your ship represented by a top down view of it. You can now bomb things.

You have four bombs.

There are four orb strongholds that you need to bomb. These are the four sites that were in Phil's computer.

1. **Alpha:** Bellevue Hospital. The orbs are using the hospital to experiment on using humans as a food source and most of the orbs are concentrated here.

2. **Beta:** Grand Central Terminal. The orb fleet of spaceships are stored here, including the mother ship. (Remember Harvey's note in the deli, "We saw the mother...")

3. **Gamma:** Statue of Liberty. This is where the orbs make the red gas that they pollute the atmosphere with. (Remember the data card message, "Destroy the Lady...")

4. **Delta:** The Empire State building. The Orb Alliance's Main Computer is located here.

Avoid Phil's ship while you bomb the four sites.

After you hit the fourth one, you are done, watch the ending.

One more thing you can try is to destroy your game in Phil's office. Select Gamma Security and change from Ground Patrol to Air Defense. Now try to bomb the Statue of Liberty.
